

## **THE EUROLOCAL PROJECT 2010-12**

The Eurolocal project was a collaboration between 4 European organisations to gather together all the learning city and region materials that could help local and regional authorities understand the importance of lifelong learning to their future. Its results can be found on [Http://eurolocal.info](http://eurolocal.info). The exercises in this section are those that can be easily used by local and regional authorities with their stakeholders in schools, universities, adult and vocational education colleges, companies and the authorities themselves to create a genuine learning community. They have been updated to fit the current needs and circumstances.
